

Highlands Slopeside Project 2050

Project 2050 unofficially started in 2013 with an initial Building Envelope Report. After the owners approved moving forward in 2015, the project was completed in December of 2017.

Improvements to the building include the following:

- ✓ New super insulated roofing, Bylin heat system
- ✓ New windows and doors
- ✓ New wood exterior siding
- ✓ New stone masonry
- ✓ New paint scheme, including new layer of stucco
- ✓ New deck railings and addition of long lasting composite decking materials
- ✓ New colonnade/entrance including garage door

The success and final outcome is truly greater than the sum of the parts. This project could not have been completed without the guidance and assistance from many. We are very thankful for The Board of Directors' hard work and dedication. The support and contributions from the owners is much appreciated, and finally, a big thank you to Dick Chandler for his commitment to the project.
